

One of the big reasons for buying the xm radio was for the news and weather updates.. If these informational stations are tampered with you invalidate the very reasons some buy these radios. Please reconsider this action for the driving industries sake. This is a safety issue, as we truck coast to coast and these stations help us to decide our routing, so we may travel safely. To avoid possible crash situations, and see that we and our freight arrives safely at our destination in a proper time frame.
